Meet Olivia the Ovary!

She works in The Woodruff Lab.

She loves science!

She will introduce you to girl talk.

What is your name? \_\_\_\_\_

All living things are made up of cells.

Olivia the ovary is made up of lots of follicles.

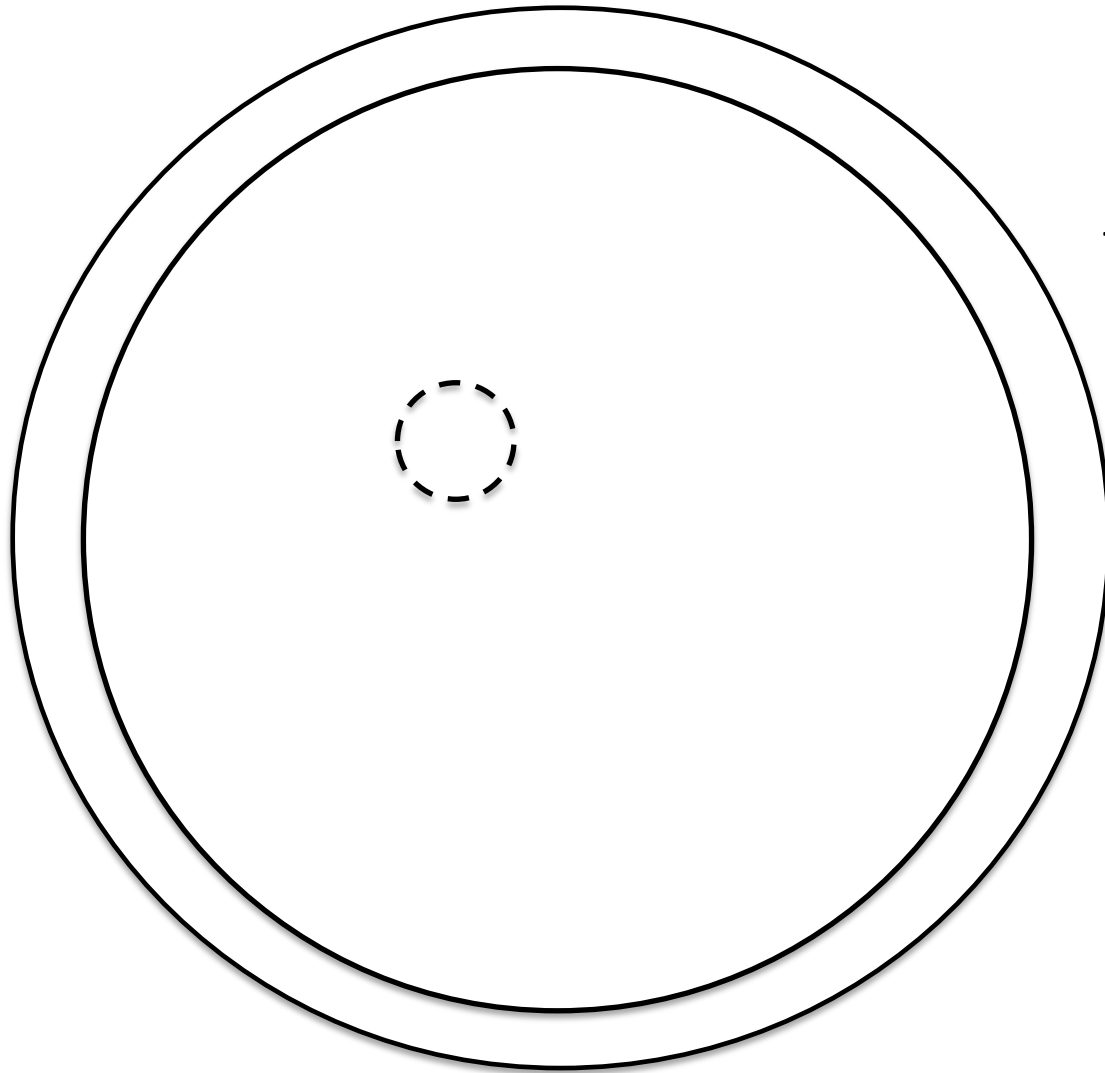

Every follicle contains an oocyte.

This is the biggest cell in the body.

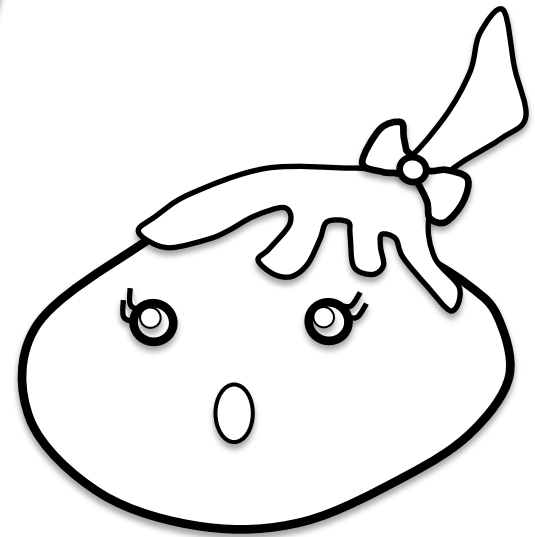

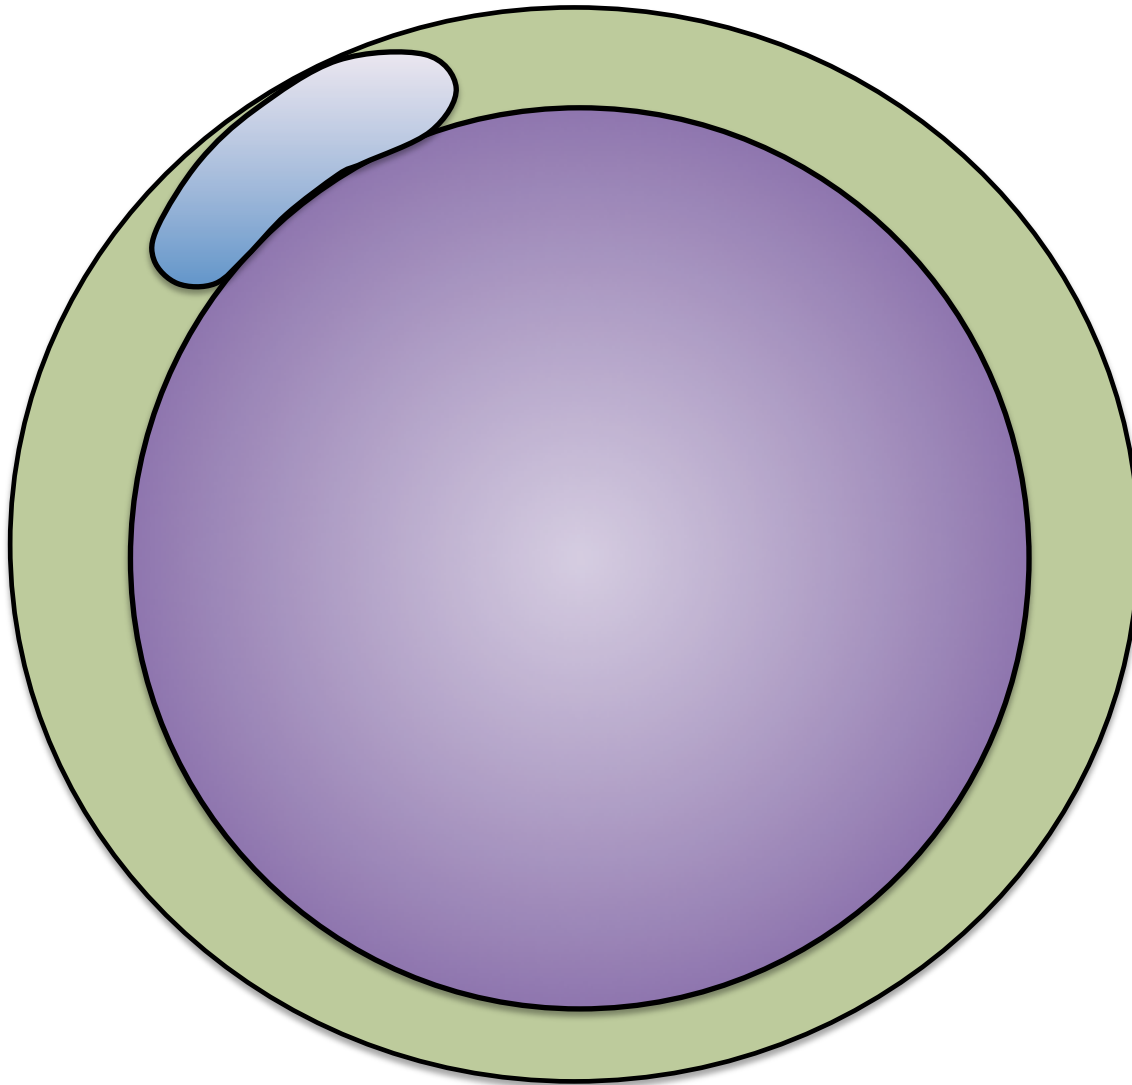

Every follicle contains an oocyte.

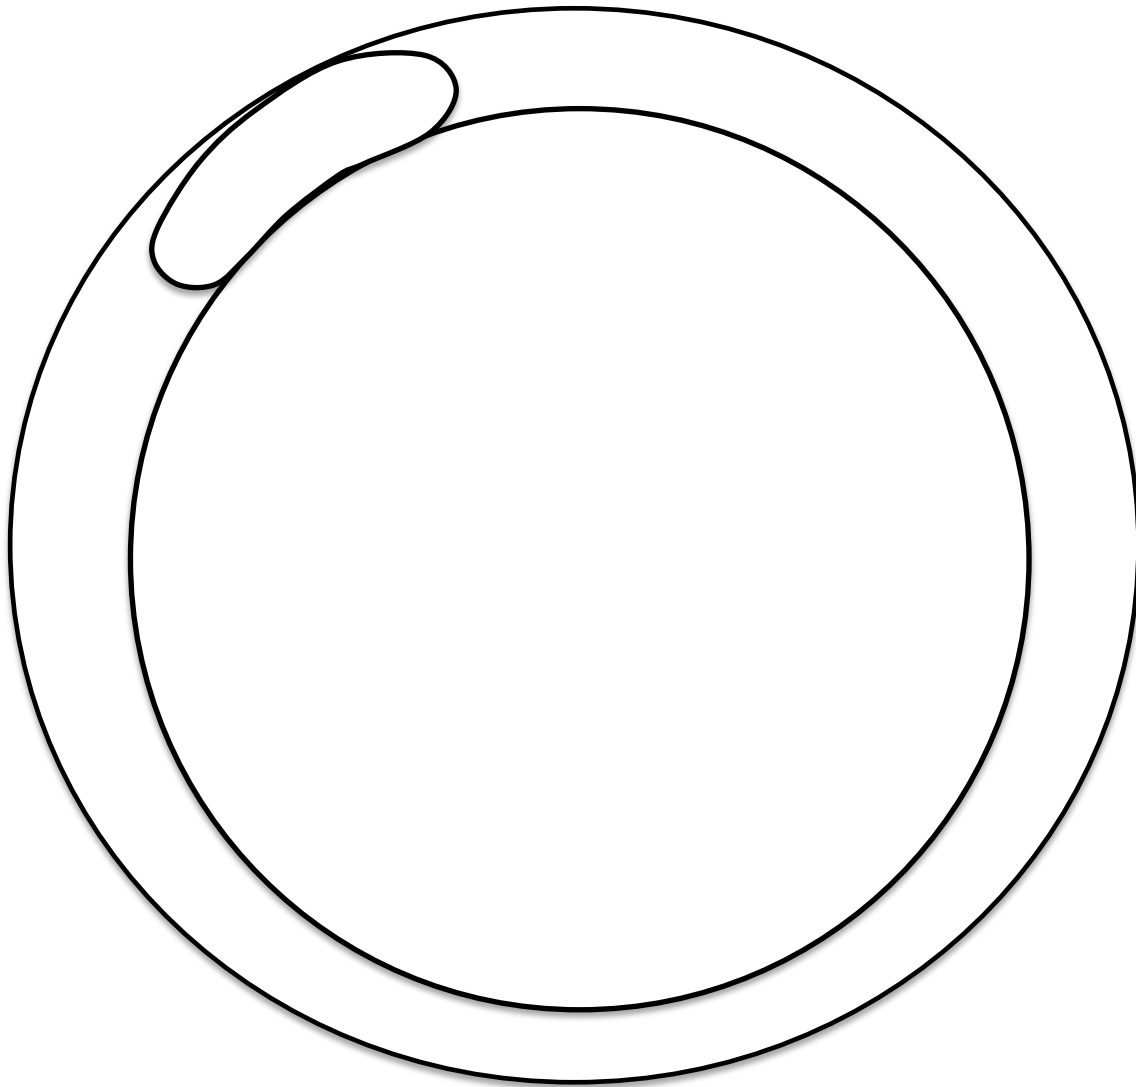

This is the biggest cell in the body.

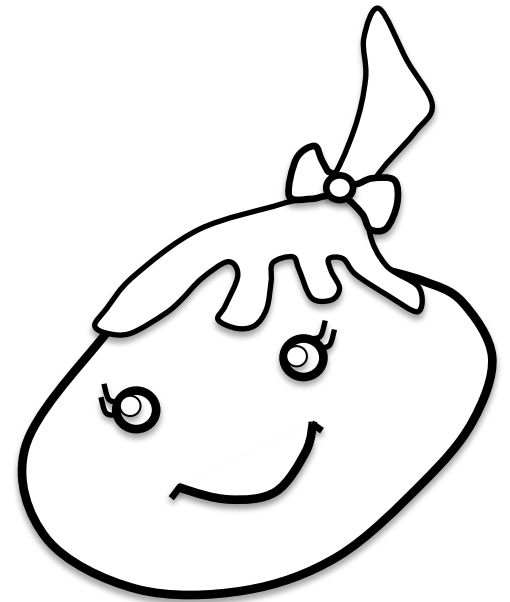

A mature oocyte is called an egg.

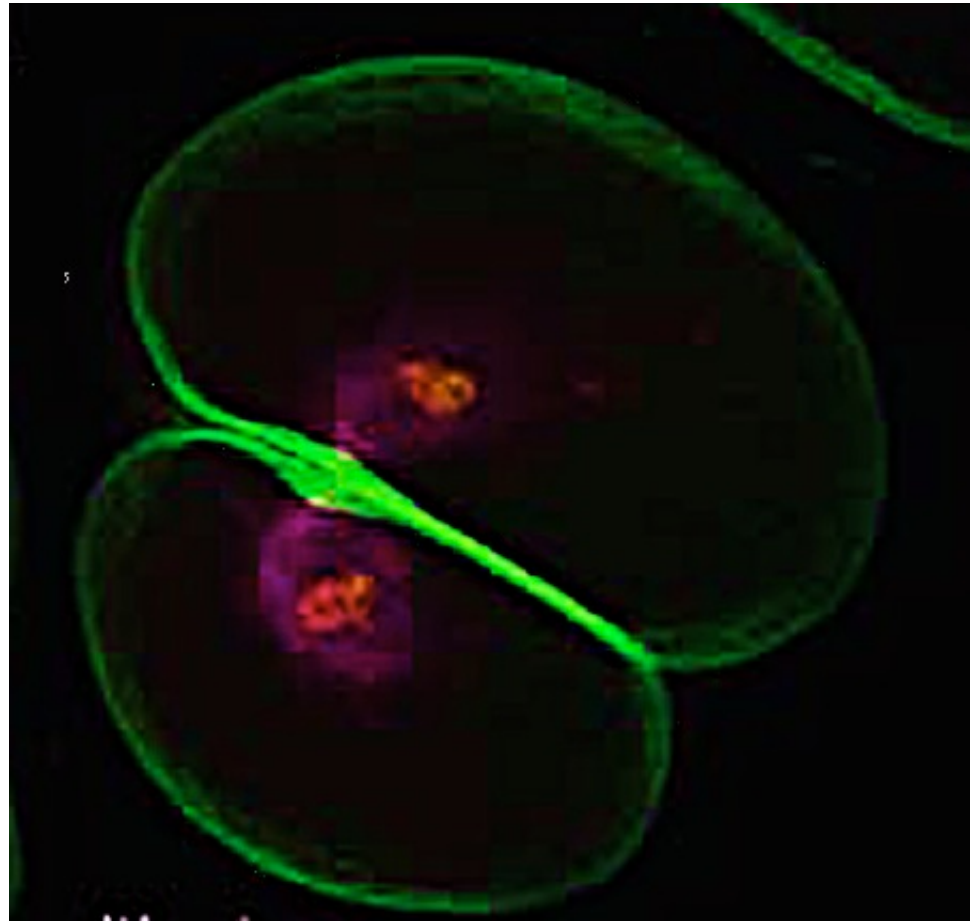

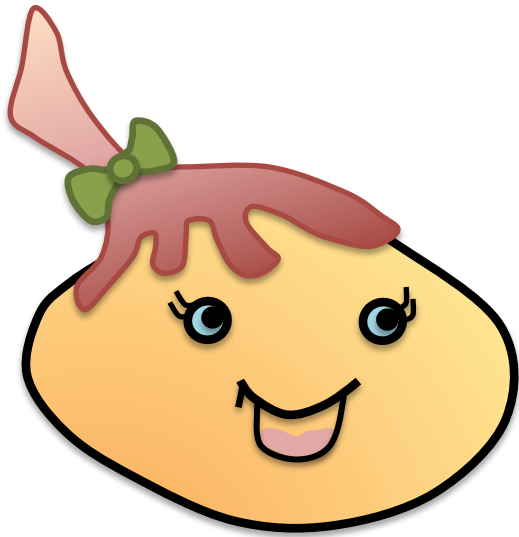

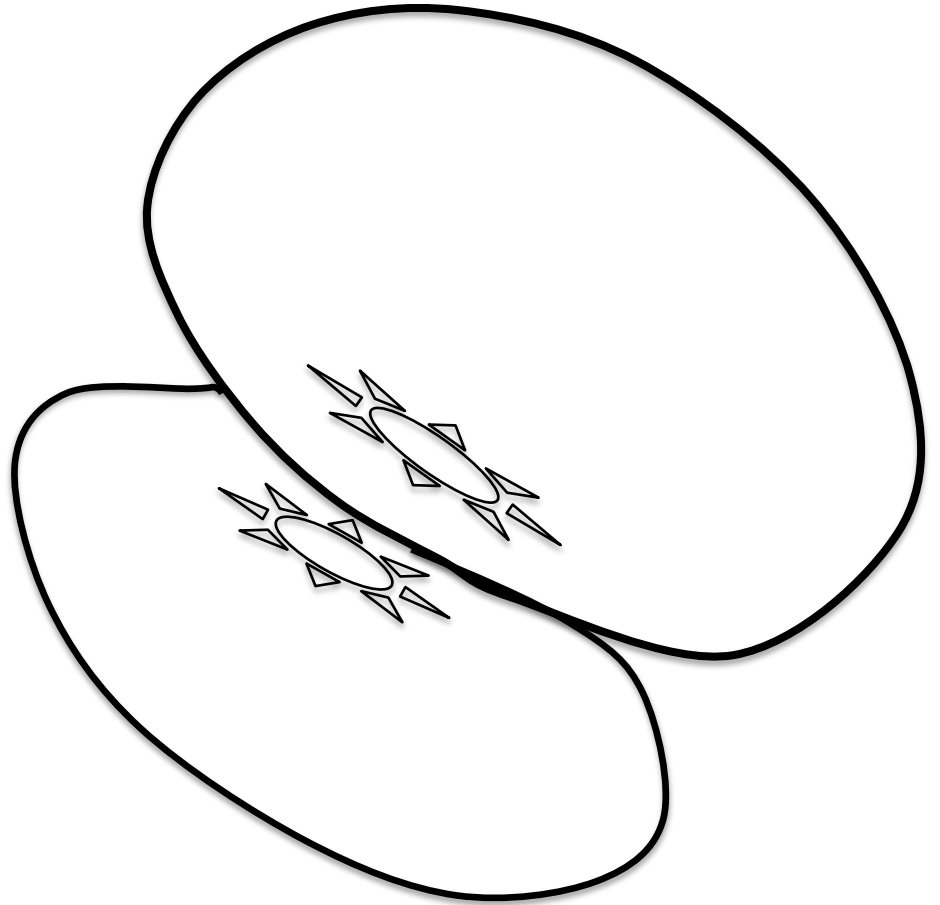

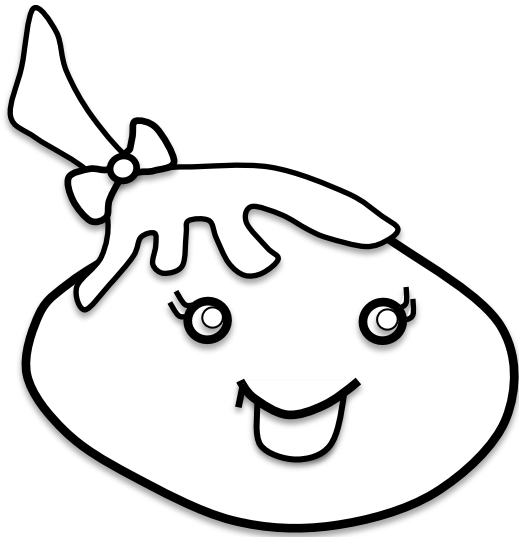

A mature oocyte is called an egg.

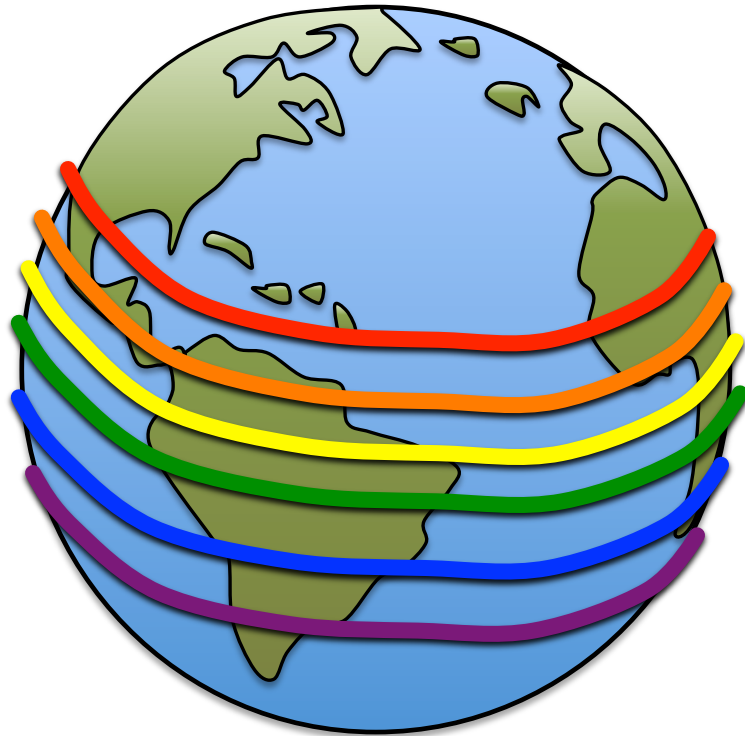

An egg contains all of the wonderful information that determines the way you are!

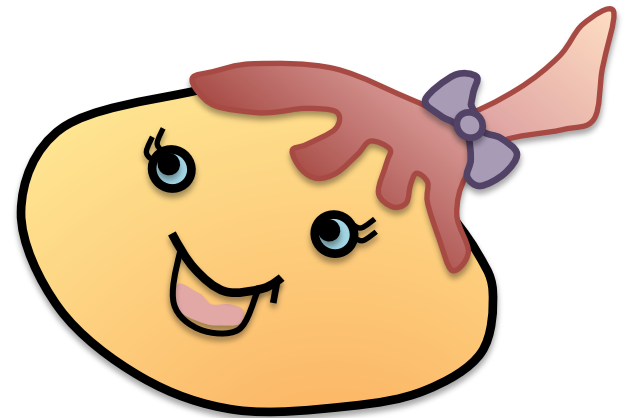

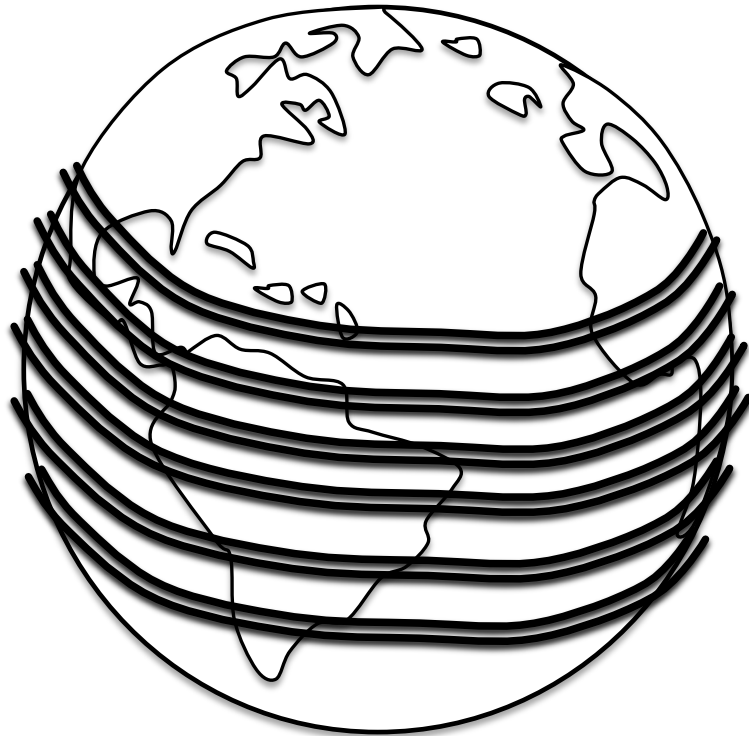

An egg contains all of the  
wonderful information that  
determines the way you are!

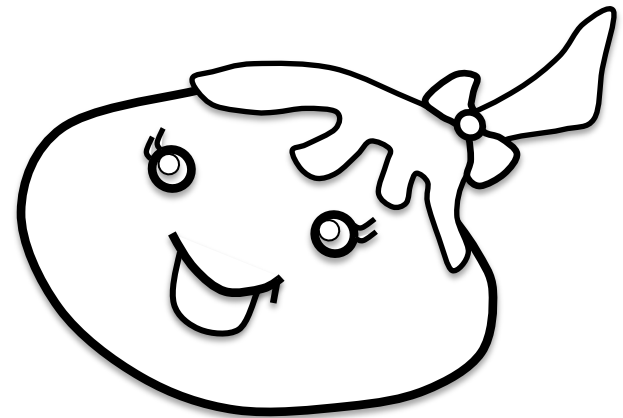

Did you know:  
DNA from your cells could wrap  
around the Earth 2.5 million times!

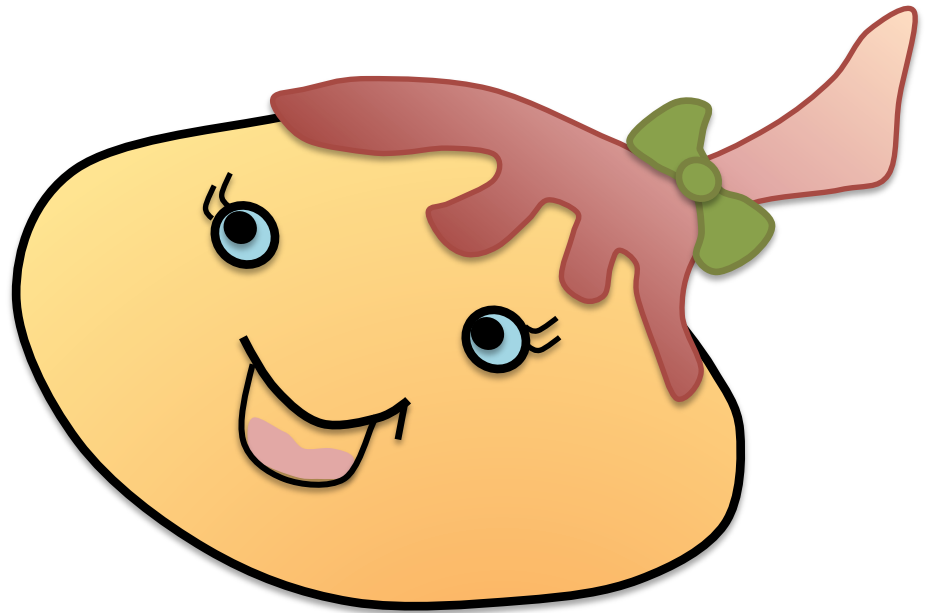

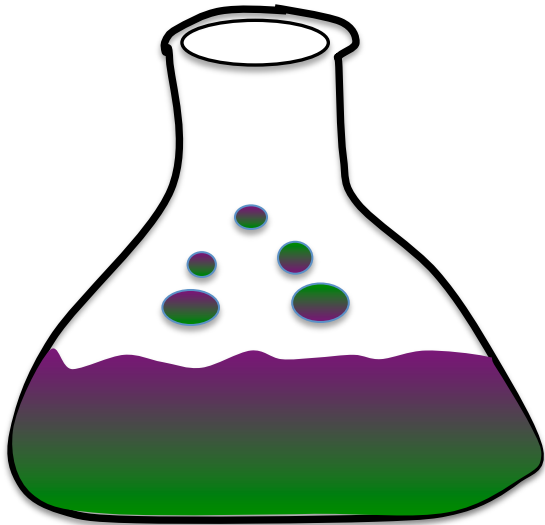

Did you know:  
DNA from your cells could wrap  
around the Earth 2.5 million times!

Olivia says...

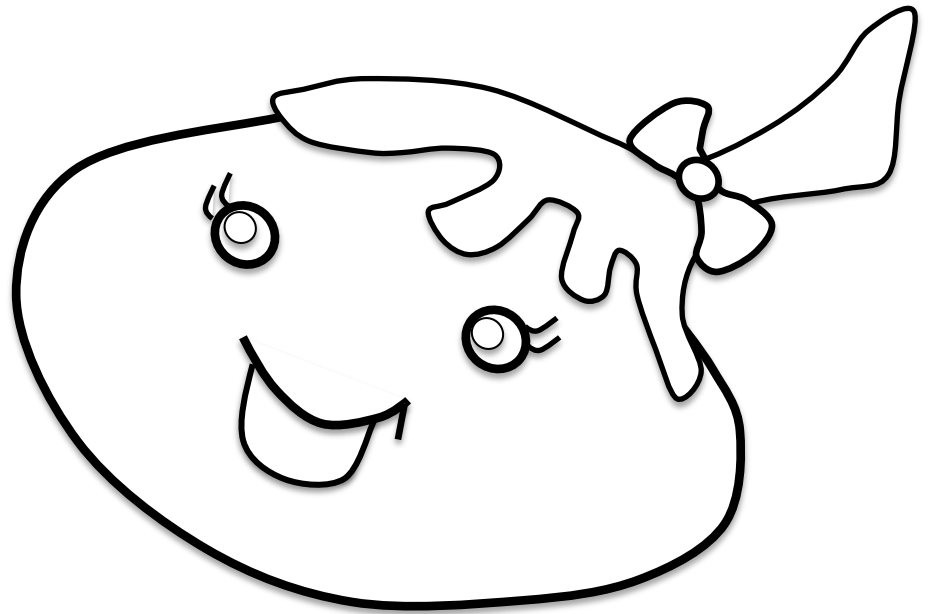

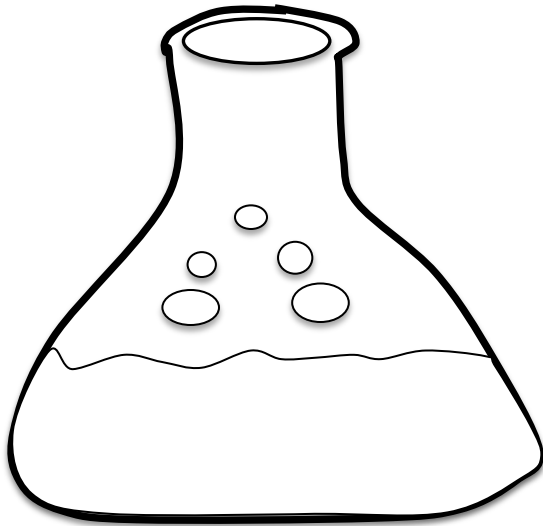

“Come visit me in lab again soon!”
